

September 27, 2019

Dear Mr. and Mrs. Resnick,

It is with great admiration that I write you regarding your heroic donation to the California Institute of Technology. There is no doubt your extraordinary contribution will greatly advance environmental sustainability research and education for this generation and many to come.

The Samuel Lawrence Foundation commends your integrity and forward-thinking action in this crucial time for the environment. Please accept these copies of *The Well of Being* and *Being the Change* as small tokens of our appreciation and friendship in a shared mission.

*Being the Change* was written by Dr. Peter Kalmus, a JPL climate scientist and a member of the group of Caltech experts advising Assemblyman Chris Holden, Chair for the California State Assembly Committee on Utilities and Energy.

Sincerely,

A handwritten signature in black ink that reads "Bart". The signature is written in a cursive, flowing style.

Bart Ziegler, PhD

Samuel Lawrence Foundation President
